

Care Policies & Safety

1. Medication Administration

Prescriptions are verified against physician orders, logged, and secured in locked boxes. Changes are executed only upon written medical orders. Daily administrations are recorded on a MAR log; errors or refusals are reported directly to VMRC.

2. SIR & Abuse Prevention

AGILE enforces a zero-tolerance standard regarding isolation, financial exploitation, neglect, or client abuse. Personnel undergo Mandated Reporter certification. Formal SIRs are submitted within the mandatory 24-hour window.

3. 24/7 Redundant Emergency Back-Up

We maintain an active, experienced On-Call management team available 24/7. Every Individual Service Plan (ISP) contains a rapid communication roadmap connecting first responders (911), primary families, and VMRC.

4. Staff Screening & Safety Credentials

Before working with clients, our personnel undergo thorough background checks, reference verifications, and behavioral screening to evaluate character alignment. Every team member maintains active CPR and First Aid certifications alongside specialized behavioral training to ensure emergency readiness.

Absolute Accountability

The "Unseen Care" Policy

Our founder integrates a defining foundational principle across our entire organization: **"Even if no one is watching you, God is watching you."** To ensure this standard is actively practiced every single day, AGILE enforces a strict **Absolute Integrity & Unseen Care Policy**.

This formal compliance standard dictates that our team treats every client with deep protective care, absolute transparency, and uncompromised respect under all circumstances. Whether a family member is standing in the room, a state auditor is inspecting the home, or a caregiver is working entirely alone with a non-verbal individual, our level of care never wavers.

SUPPORTED LIVING SERVICES

OUR MISSION STATEMENT

"At AGILE, our mission is to provide empathetic care, tailored support, and a supportive environment for our clients. Our priority is to nurture and foster the relationships between our clients and staff to form a cohesive relationship rooted in trust and respect for one another."

Built on Nurture & Grace

AGILE was born out of 30 years of hands-on experience on the front lines of caregiving. Over three decades in this field, our founder witnessed a critical missing piece in traditional care models: an impatience driven by corporate profit over the quality of individual nurture. As a mother of four, she understood that human value far exceeds monetary value. AGILE was established to fill that gap—pouring a mother's protective heart, deep patience, and unwavering faith into supporting our community's most vulnerable individuals.

Evidence-Based Behavioral Support

Our care model collaborates directly with behavioral specialists to design individualized behavior support plans. We focus entirely on positive reinforcement and skill-building to effectively support individuals through their unique behavioral challenges.

"The name Abundant Grace is deeply personal to us. Inspired by a shared family vision with my husband and children, it honors the legacy of my grandmother, Grace. It is a daily reminder that everything we do—every life we touch and every home we support—is built 'By God's Grace,' demanding a higher standard of care, love, and absolute accountability."

— Esther Daramola Fagbolu, Founder

Core AGILE Principles

Regulatory Framework: W&I Code § 4689 / Title 17 § 58632

1. EXISTING HOMES (§ 4689(A)(1))

We provide comprehensive care exclusively within the typical community housing options where our clients currently reside. Our team ensures domestic spaces remain safe, functional, and deeply nurturing.

2. ADAPTIVE PORTABILITY (§ 4689(A)(2))

Our direct care models are fully responsive. As medical, physical, or emotional needs evolve, daily support seamlessly shifts within the household, preserving continuity without disrupting their environment.

3. ROUTINE STABILITY (§ 4689(A)(3) & (4))

Our professionals bring dedicated structure and reliable stability to the home. We establish consistent daily routines, proactive safety protocols, and well-organized spaces.

4. PROFESSIONAL OVERSIGHT (§ 4689(A)(5) & (6))

Drawing from deep frontline experience, our team provides active guidance and mentoring. We coach individuals through household logistics and daily schedules under steady professional oversight.

5. CIRCLES OF SUPPORT (§ 4689(A)(7) & (8))

We specialize in providing dedicated care for individuals with mild to moderate developmental disabilities, focusing on establishing natural, enduring relationships involving family, neighbors, and peer networks.

Communication & Choice Risk

Many individuals entering the SLS community lean toward introverted communication patterns, often keeping their deeper emotions or household desires private. AGILE personnel are trained to move past a clinical checklist, using patient, respectful communication techniques to encourage individuals to voice their goals.

When individuals make challenging decisions, we utilize a structured risk-assessment tool. Rather than exercising overbearing control, we protect individual safety by helping clients understand choices and potential outcomes, ensuring they feel secure, respected, and fully capable of navigating their choices within a supportive, structured framework.
